Can you use photovoltaics and solar thermal technology at the same time?

Would you like to know more?

We would be happy to inform you about 2Power innovations.

Our Answer: One solution that combines both technologies.

With a system from 2Power.

2Power Controller
2Power Thermal Storage
2Power Power Storage
2Power PVT Collector System Module
In the eastern area of the Parkstadt Unterliederbach development, around 11 ha in size, effort space for 300 new housing units. The development will include single-family homes and duplexes, as well as publicly funded rental properties. The major- ity of the planned construction has already been completed with its main focus on family housing. Technically, the project included 644 photovoltaic systems with 58 and 110 m² in size. They were built using energy plus con- struction, and all finishing, use a passive design.

Advantages

1. Double use of the roof surface
2. Cooling provides added revenue growth
3. Snow free in the winter
4. Uniform roof surface design
5. Made in Germany quality
